BILL 15 — DUBÉ'S REFORM OF THE HEALTH AND SOCIAL SERVICES SYSTEM:

- Is an attack on women, who make up 80% of the workers in the system: Working conditions, autonomy and workload have been in dire need of improvement for too long. Bill 15 makes things worse;
- Is part of a trend to devalue and control women's work;
- Opens the door to accelerated privatization of the healthcare system;
- Abolishes virtually all levers of public control over the system in favour of top guns from the private sector;
- Threatens the autonomy of independent community action groups;
- Attacks the autonomy of midwives and ultimately women's freedom of choice over their own bodies;
- Focuses on therapeutic care and entirely neglects prevention and public well-being;
- Attacks the right to unionize;
- Is being rammed through without real public debate.
